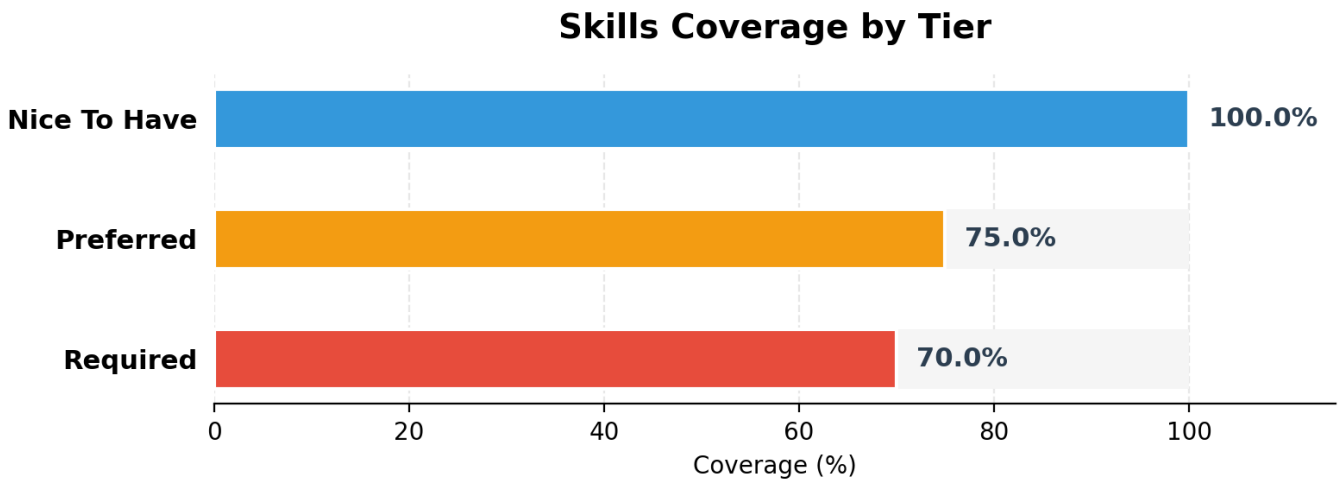
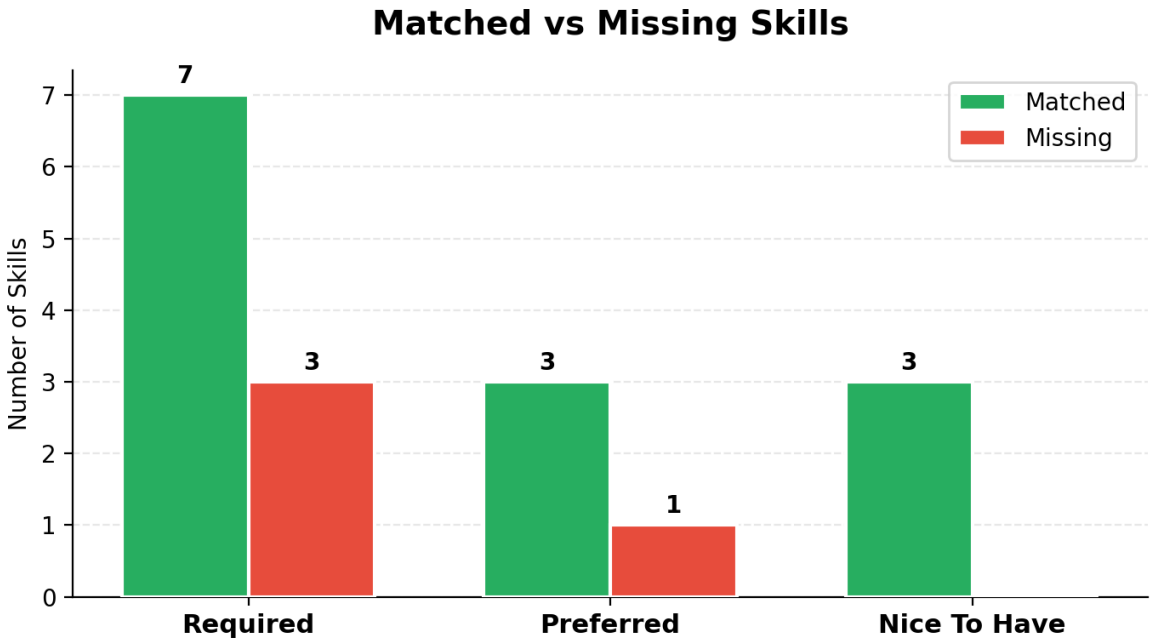
Skills Match Breakdown

Overall match score: 72.5%. Below is the detailed breakdown by skill tier.





[+] Matched Skills

Required:

[+] Communication
[+] Data Analysis
[+] Data Cleaning
[+] Data Visualization
[+] Power Bi
[+] Python
[+] Sql

Preferred:

[+] Aws
[+] Data Modeling
[+] Data Pipelines

Nice To Have:

[+] Collaboration
[+] Curiosity
[+] Strategic Thinking

[-] Missing Skills (Gap)

Required:

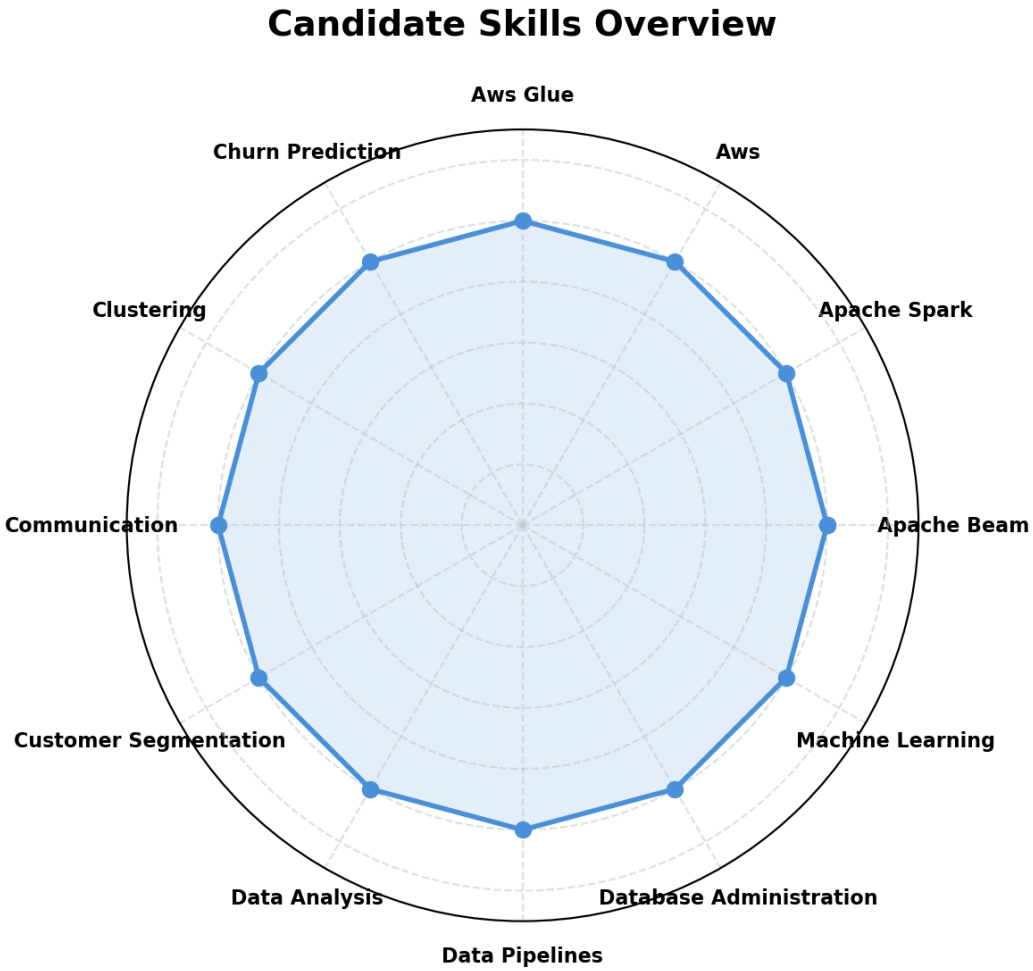
[-] Business Insights
[-] Statistics
[-] Tableau

Preferred:

[-] Gcp

Candidate Skills Overview

John Doe has 18 identified skills across technical, tools, and soft skills categories.



Complete Skills Inventory

* Apache Beam
* Apache Spark
* Aws
* Aws Glue
* Churn Prediction
* Clustering
* Communication
* Customer Segmentation
* Data Analysis
* Data Pipelines
* Database Administration
* Machine Learning
* Predictive Models
* Python
* R
* Recommendation Systems
* Sql
* Team Management

30-Day Learning Roadmap

Gap Analysis Summary

* John Doe has a strong foundation in data analysis, visualization, and cloud platforms, particularly AWS. His existing skills in Python, SQL, and data modeling are highly relevant to the meta Role. However, he lacks specific skills in Business Insights, Statistics, and Tableau, which are required for the role. Additionally, familiarity with GCP is preferred but not mandatory. The focus will be on closing the required skills gap first, then addressing the preferred skill.

30-Day Learning Roadmap

Week 1: Business Insights

* Day 1-2: Introduction to Business Insights - [Read "Business Intelligence Guidebook: From Data Integration to Analytics" (free chapters available online), Watch Coursera's "Business Metrics for Data-Driven Companies" (free trial)]

* Day 3-5: Key Performance Indicators (KPIs) and Metrics - [Complete LinkedIn Learning's "Business Intelligence Foundations: Key Performance Indicators" (free trial), Practice identifying KPIs in case studies]

* Day 6-7: Hands-on project - [Analyze a sample dataset, identify KPIs, and create a simple business insights report]

Week 2: Statistics

* Day 8-10: Basic Statistics Refresher - [Complete Khan Academy's "Statistics and Probability" course (free), Focus on descriptive statistics, probability, and distributions]

* Day 11-13: Inferential Statistics - [Continue with Khan Academy, focus on confidence intervals, hypothesis testing, and p-values]

* Day 14: Hands-on project - [Analyze a dataset using statistical methods to draw business insights]

Week 3: Tableau

* Day 15-17: Tableau Basics - [Complete Tableau's free "Tableau Fundamentals" training, Practice creating basic visualizations]

* Day 18-20: Advanced Tableau - [Complete Tableau's "Tableau Intermediate" training (free), Learn about calculated fields, parameters, and dashboards]

* Day 21: Hands-on project - [Create a comprehensive dashboard using a sample dataset]

Week 4: GCP and Integration

* Day 22-24: Google Cloud Platform Basics - [Complete Google Cloud's "Google Cloud Platform Big Data and Machine Learning Fundamentals" (free), Focus on understanding GCP services relevant to data analysis]

* Day 25-27: GCP for Data Analysis - [Complete Coursera's "Google Cloud Platform Big Data and Machine Learning Fundamentals" (free), Practice using BigQuery and Data Studio]

* Day 28-30: Integration Project - [Integrate your Tableau dashboards with GCP, practice analyzing data using both AWS and GCP]

Milestones & Success Metrics

* End of Week 1: [Create a simple business insights report using a sample dataset]
* End of Week 2: [Complete statistical analysis on a dataset and present findings]
* End of Week 3: [Create a comprehensive Tableau dashboard]
* End of Week 4: [Integrate Tableau dashboards with GCP and AWS, present a comparative analysis]

Recommended Resources

* Business Insights: "Business Intelligence Guidebook" by Rick Sherman, Coursera's "Business Metrics for Data-Driven Companies"
* Statistics: Khan Academy's "Statistics and Probability" course
* Tableau: Tableau's free training resources, "Tableau 10: The Official Guide" by Tableau Software
* GCP: Google Cloud's free training resources, Coursera's "Google Cloud Platform Big Data and Machine Learning Fundamentals"

Daily Time Commitment

* Suggested hours per day: 3-4 hours
* Optimal schedule: 1-2 hours in the morning, 1-2 hours in the evening
* Weekends: Focus on hands-on projects and review

Encouragement and Realistic Timeline

* Closing these skill gaps in 30 days is ambitious but achievable with consistent effort. Focus on understanding core concepts and practicing with real-world datasets. Remember, the goal is to demonstrate proficiency, not mastery, within this timeframe. Good luck, and stay curious!
